Money Matters

Training Workshop

No prerequisites required. Half day workshop.

Money Matters

Many staff performance issues in the workplace are the result of staff worrying about their financial situation.

Understanding money matters and being able to budget effectively removes the temptation to break company policies and procedures and/or break the law.

This program provides the understanding and tools necessary to enable your staff to implement a basic, yet effective, financial budget for themselves and their families.

This program is particularly useful if you find you receive regular requests for garnishee orders or soft loans and need to remove this practise from your business.

COURSE OVERVIEW

- Budgeting
- Saving
- Manage your funds

WHO SHOULD ATTEND

- All Staff

BENEFITS

Your employees will understand the importance of budgeting and saving. They will see the importance of living within their means and learn about the harsh consequences of overspending and having loan accounts that cannot be paid.

ASSESSMENT

- A full colour manual
- Templates for the required sections
- Relevant assessment of competence
- Contains personal and smart ways of budgeting and provides staff with practical examples
